WORK EXPERIENCE | 4 YOY

Infosys Pune, Maharashtra

Dot Net Developer (SE)

November'22-Now

Supply Chain Management-ArcelorMittal | .Net 8, Microservices, MS SQL, Angular, Azure, xUnit

- Contributed to enhancing and maintaining multi-layered .NET Core Web APIs using Controller-Service-Repository patterns, improving reusability and maintainability by 35% through SOLID and DRY principles.
- Streamlined database operations, implementing CRUD functionalities with MS SQL Server, and reducing query execution times by 40% through indexing and query optimization techniques.
- Translated business requirements into functional solutions, delivering user stories with 100% within the sprint.
- Analyzed and resolved production and code-level issues, reducing recurring defects by approximately 25–30%.
- Contributed to Angular frontend by adding new features and UI enhancements.
- Managed CI/CD pipelines in Azure DevOps — build, test, Docker image push to ACR, and staged deployments across Dev, Test, Accept and Prod environments on AKS.
- Monitored deployed services using Azure Log Analytics and kubectl — checked pod health, traced exceptions, and performed rollbacks when needed in production.
- Leveraged GenAI tool Co-pilot, GPT-4.1 to resolve complex code issues, optimize implementations, and generate unit tests, improving development efficiency and code quality.

SKILLS

- Languages: C#
- Frameworks & Web: .NET Core, ASP.NET Core
- EF Core, Angular, HTML, CSS, JavaScript
- Databases: Microsoft SQL Server
- Tools: Visual Studio, VS Code, Postman, GitHub
- Monitoring & Testing: Grafana, Prometheus, xUnit
- DevOps & Cloud: Azure, Azure DevOps, Git, CI/CD
- Core Concepts: DSA, OOPs, DBMS, SOLID, ACID

PROJECTS

Food.Web

.NET Core MVC, Entity Framework Core

Oct'24 - Dec'24

- Developed a modular food ordering platform using .NET 8 and microservices, integrating Stripe mock payments and improving scalability and deployment efficiency by 40%.
- Secured user/admin access via .NET Identity and role-based authentication, reducing unauthorized access incidents.
- Integrated Azure Service Bus to process 10K+ messages/day, enabling reliable async communication between services.
- Implemented Ocelot API Gateway, centralizing routing and security for 6+ microservices.
- Enabled interactive API testing using Swagger across all endpoints, enhancing developer onboarding speed by 30%.
- Improved data retrieval efficiency using EF Core, Repository Pattern, and SQL Server, resulting in 25% faster queries.
- Structured the solution using N-layer architecture, improving code maintainability and modular testing efficiency.

Movie.Recommend

ASP.NET, Entity Framework Core, Angular, MSSQL

March'25-Oct'25

- Built a movie recommendation API using ASP.NET Core and C#, structured with layered architecture (API, Application, Domain, Infrastructure) ensuring clear separation of concerns.
- Designed RESTful endpoints following best practices and integrated a dedicated Auth API module for authentication and authorisation to secure protected routes and user-specific functionality.
- Applied DTOs, dependency injection, and configuration patterns to maintain scalability, testability, and clean code principles.

EDUCATION

Bikaner Technical University, Bikaner, Rajasthan

Electrical Engineering | 8.4 CGPA

2018 - 2022

CERTIFICATIONS

- Infosys Certified C# Programmer
- Infosys Certified Dot Net Core Web API Developer
- Infosys Certified Design Professional
- Solved around 400+ DSA problems on various platforms
- Microsoft Certified : Azure Fundamentals 900
- Microsoft GitHub Foundations Certified
- Microsoft GitHub Copilot Certified
